STORY OF THE COELACANTH

appeared 300,000,000 years

ago, thrived until 60,

000,000

DEVONIAN

remained unchanged
for 200 million years.

350,000,000 years ago, in
the Silurian period, verte. fish
first appeared

an immediate side branch
of CROSSOPTERYGII,
the first time fish with
bony jaws and
overlapping scales,
the forerunner of all
modern fish. In fact the
group gave rise to
forms that colonized
the land, paving the way
to the development of all
land verte. via the
amphibians.
